

Lakelet

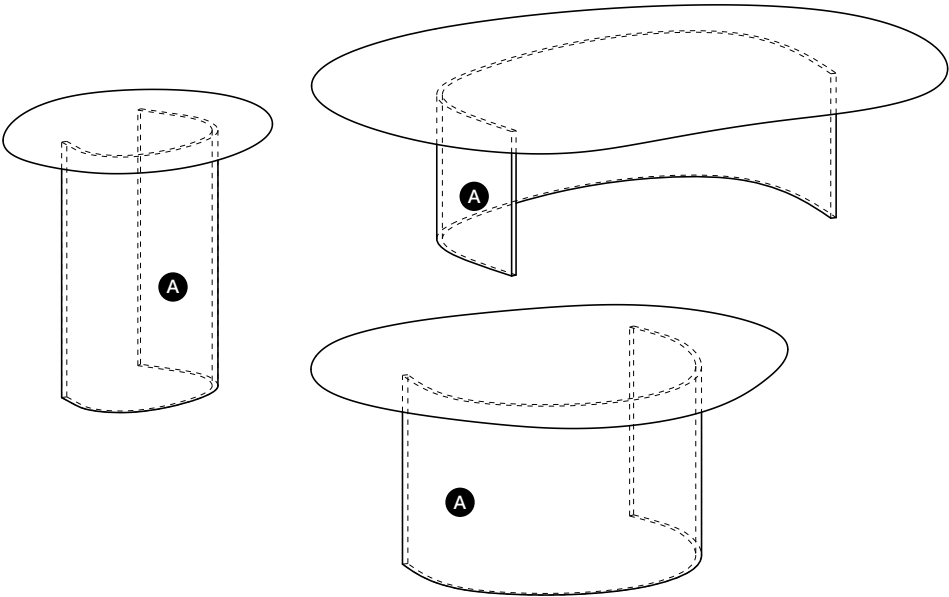

Front, 2025

A collection of three glass coffee tables as a natural complement to the Pebble Rubble project. Inspired by the natural landscape of Sweden, the designers have created watercolour paintings that, when transferred to glass, evoke the colours of a forest reflected in a body of water. The small tables, which come in different shapes and sizes, rest on a curved glass base glued to the floor.

Lakelet are available in clear float glass, fumé glass, with a moulded top and transparent or fumé base and in an elegant iridescent version.

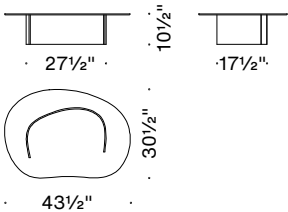

A Curved, corrugated float glass
glued to the tops

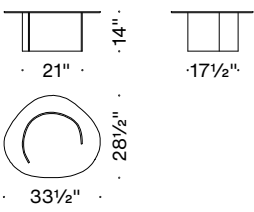

Top	0.39 inches flat float glass. In the printed version, the decoration on the tops is achieved through digital printing applied to the underside of the glass surface. The tops of the iridescent version are in back-lacquered corrugated float glass.
Base	0.39 inches curved corrugated float glass. In all versions the base is glued to the top.
Technical Information	In the iridescent version, the tables are 0.39 inches higher than in the other versions due to the use of a stainless steel plate, ensuring optimal adhesion between base and top.
