

Bilboquet

Designed by Philippe Malouin, 2023

6W

Table lamp emitting direct light. Features an adjustable head with integrated LED light source and cut-off to reduce glare. Body in pigmented polycarbonate derived from a by-product of paper production. Adjustability via steel sphere treated with PVD protective layer. Designed according to ISCC standards and assembled without glue, allowing full disassembly and future recyclability.

Designed by Philippe Malouin, Bilboquet brings playful flexibility to everyday lighting. Inspired by magnetic ball joints, its head pivots freely to direct light wherever needed, while the cable can be left loose or hidden in the base, allowing the lamp to move easily through the home. Simple in appearance but full of personality, it fits the multilayered approach to living that defines today's generations. Made with sustainability in mind, Bilboquet is fully disassemblable, recyclable and future-proof. Bilboquet was awarded the Compasso d'Oro ADI Award in 2026.
