

BILIA

Gio Ponti

Nothing more than a sphere, set in an apparently impossible feat of balance, upon a cone that serves as the base. One of Gio Ponti's many compositional magic tricks, designed in 1932. The counterbalancing of two elementary geometric forms results in an original, perfectly proportioned object. An unpretentious composition, enriched by the extraordinary balance of its proportions and the stylish discretion of non-reflective materials. The light is diffused and valorized by the geometrical simplicity of the design.

BILIA - BRUSHED COPPER
