

Clay

Zanellato/Bortotto, 2026

Conceived as part of the Clay family, these coffee tables express the same values of balance between design and artisanal craftsmanship on a more intimate scale. The top features a handcrafted ceramic tile from the historic district of Nove, Vicenza, turning each piece into a small work of art. The glazed surface creates a refined dialogue with the wooden structure, balancing material richness and visual lightness.

Designed as modular elements, the coffee tables can be placed either free standing or combined freely, creating compositions that adapt naturally to different spaces. The linear base in oak or walnut supports the top with description, defining an essential, seemingly suspended volume.

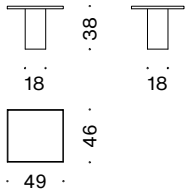

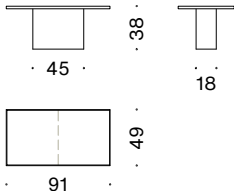

Base	Base made of MDF panel veneered in oak or Canaletto walnut. Finished with a transparent, natural-effect varnish. Back panel and floor-standing base made of black bilaminated MDF. Black polypropylene feet.
Table top	Top made of MDF panel veneered in the same wood species as the base. Perimeter frame in solid finger-jointed oak or Canaletto walnut. Finished with a transparent, natural-effect varnish. Tiles bonded using a specific adhesive material, with joints grouted using decorative cement-based material.
