

Lowland

Patricia Urquiola, 2000

The Lowland seating system comprises linear elements in dynamic relationship with each other. Conceived for use in common and public spaces, its architectural qualities stand out in domestic environments.

Essentiality, dynamism and transformation represent the trait d'union between different elements. Seats and backs are modules that can be coordinated, combined and reconfigured with full compositional freedom.

The armrests enclose the composition as brackets enclose a sentence. A language that extends from the sofa to the bed, in aesthetic assonance.

Headboard	Structure in wood and wood derivatives with flexible polyurethane foam padding.
Bed frame	Structure in wood and wood derivatives with flexible polyurethane foam padding.
Feet	Cantilever structure in 0,55" diameter 304 stainless-steel round bar. Transparent PVC floor protectors.
Upholstery	The Lowland bed features fully removable covers. For the recommended fabrics see the table on pages 5-7.
